

[European Toolkit for Schools](#) [1]

The European Toolkit for Schools offers information and ideas to improve collaboration and to enable all learners to succeed in their education.

It presents resources, examples and research evidence from schools, universities, education ministries and other organisations from across Europe. The Toolkit offers a self-assessment tool which enables school practitioners to reflect on the inclusive policies and practices in their schools. The self-assessment tool also offers suggested improvements based on the answers provided. The Toolkit forms part of the European Commission's School Education Gateway initiative.
