

Classification des animaux
en groupes emboîtés

The diagram illustrates the concept of nested sets (ensembles emboîtés) for animal classification. It features four nested rounded rectangles, each representing a different level of classification. The outermost rectangle is filled with diagonal hatching. The second rectangle is filled with a grid of plus signs. The third rectangle is filled with a grid of small dots. The innermost rectangle is empty. Braille characters are placed at the top of each level, indicating the specific classification level for that set.
